

KISSCARE®

BIOMEDICAL SKIN CARE

KISSCARE® is a NATURAL REPLACEMENT for your own skin that is HYPOALLERGENIC and contains NO preservatives, fragrances or other harmful ingredients.

KISSCARE® comes in special formulations for even the most sensitive tissues, including eyes, ears, mouth and airways.

KISSCARE® is the ultimate natural which works by cosmetic by hydrating skin, preventing bacterial and fungal growth along with the environmental pollutants from damaging or infecting tissue and therefore restoring a well balanced and healthy skin that feels SOFT, SMOOTH and SILKY with no Oily Mess.

KISSCARE® Helps Control Pain by Protecting and Soothing Exposed Nerves in a Wound

In independent trials, KISSCARE® Has been shown to be EFFECTIVE IN TREATING:

| | |
|-----------------------|--------------------------|
| Aging Skin | Age Spots |
| Chemical Peels | Derm-Abrasion |
| Laser Peel | Frown Lines and Wrinkles |
| Age Lines | Cold Sores |
| Fever Blisters | Brown Spots |
| Corns and Warts | Dermatitis |
| Eczema | Rosacea |
| Psoriasis | Sun Damage/Sunburn |
| Sore Throat | Dry, Itchy Eyes |
| Scar Tissue & Keloids | Waxing |
| Insect Bites & Stings | Radiation Burns |
| Reduces Calluses | Reduces Roughness |
| Acne Blemishes | Diaper Rash |
| Foot Fungus | Cuts |
| Burns | Scrapes |

How To Use:

KISSCARE® Liquid

1. Spray a small amount of KISSCARE® Liquid onto the desired skin surface, only enough liquid to lightly wet its surface.
2. Gently massage the KISSCARE® Liquid onto the desired skin surface, spreading to cover a large area.
3. Allow to dry. Once dry, KISSCARE® treated skin will feel silky smooth.

KISSCARE® Concentrate Gel (100% Medical Grade KISSCARE®)

1. The applicator has a screw on tip. It is removed easily by flexing the tip and then un-screwing in a counter clockwise direction.
2. To dispense gel, press firmly on the applicator plunger. Once the Gel begins to move, pull back on the plunger to avoid dispensing excess material. Small quantities of Gel may be aspirated(pulled back) into the applicator tip.
3. A very small drop may be "dabbed" onto the skin in 6-8 spots and then spread by massaging to cover several square inches of skin. Remove all excess Gel with an adsorbent cloth so that the skin feels dry, silky and smooth
